CIT 140 · Week 4 · Cedar Junction

Validated Requirements Set

Validated Requirements Forum · Revision 6271

R-01 · functional

Requirement: The system must use the "held" to represent a visitor who has arrived, but cannot continue, and the "ready" to represent a visitor who has arrived and can be seen.

Source: W04-S01 · Dana Ruiz

Rationale: It matters because it allows the system to distinguish between two different types of visitors.

Acceptance check: When the visitor arrives, and their condition has been confirmed, Intake Coordinators are able to make a series of calls to confirm workflow and status.

Priority: Must · **Validation:** Confirmed by Dana Ruiz

Conflict or decision: Intake uses the "hold" status to represent a visitor who cannot move forward, and the "ready" status to represent a visitor who is able to move forward.

R-02 · user

Requirement: The staff must immediately confirm which iteration of "held" applies to the visitor, and how to follow-up.

Source: W04-S01 · Dana Ruiz

Rationale: It matters because it requires direct and immediate staff attention to proceed with the next approved step.

Acceptance check: Intake coordinators are able to make a series of calls to confirm the status.

Priority: Must · **Validation:** Confirmed by Dana Ruiz

Conflict or decision: Intake uses the "hold" status to represent a visitor who cannot move forward, and the "ready" status to represent a visitor who is able to move forward.

R-03 · business

Requirement: Same-day slots can only be offered after a room and qualified clinician are available.

Source: W04-S02 · Dr. Lena Okafor

Rationale: It matters because it ensures that Clinical Operations has the necessary resources before making commitments.

Acceptance check: The client and staff are able to check open times on the calendars, but that does not definitively confirm an open session.

Priority: Must · **Validation:** Confirmed by Dr. Lena Okafor

Conflict or decision: Both a room and clinician must be available before readiness is confirmed.

R-04 · functional

Requirement: The affected staff and visitor need their expectations to be updated to ensure that there is available resources for the visit.

Source: W04-S02 · Dr. Lena Okafor

Rationale: Clinical Operations requires that the readiness state definitively confirmed before Intake promises start times.

Acceptance check: The affected parties are able to view the direct information without any of the clinical details.

Priority: Must · **Validation:** Confirmed by Dr. Lena Okafor

Conflict or decision: Both a room and clinician must be available before readiness is confirmed.

R-05 · user

Requirement: The visitor's preferred language, communication, and approved support must be confirmed and approved through a visitor portal.

Source: W04-S03 · Priya Shah

Rationale: It matters because it prevents the visitor from needing to keep explaining their preferences multiple times.

Acceptance check: A support request to check preferences remain available to authorized staff through confirmation, rescheduling, and check-in.

Priority: Must · **Validation:** Confirmed by Priya Shah

Conflict or decision: The visitor can use the visitor portal to communicate their needs, or ask for a phone/staff-assistant route towards an individual informed about the visitor's needs, and the means to send that information.

R-06 · constraint

Requirement: The required alternative would require a phone or staff-assistant route that accomplishes the same purpose.

Source: W04-S03 · Priya Shah

Rationale: It matters because the service cannot function on a single digital channel for access to a service.

Acceptance check: Any related staff are able to contact another party with relevant information regarding the visitor's preferences.

Priority: Must · **Validation:** Confirmed by Priya Shah

Conflict or decision: The visitor can use the visitor portal to communicate their needs, or ask for a phone/staff-assistant route towards an individual informed about the visitor's needs, and the means to send that information.

R-07 · nonfunctional

Requirement: The shared displays may only show the minimum information staff need for the given task, and detailed access follows staff roles.

Source: W04-S04 · Jordan Kim

Rationale: The minimum information rule exposes staff to just the resources they will be using, not distracting them with unnecessary details.

Acceptance check: The system retains all changes and values it has or has had, and the times of each of those changes.

Priority: Must · **Validation:** Confirmed by Jordan Kim

Conflict or decision: The minimum information staff is provided with only necessary information for the given task, and detailed access follows staff roles. This is to eliminate the risk of distracting the staff with too much or less important details.

R-08 · functional

Requirement: The change history must retain who made the change, the previous value, the new value, and the time.

Source: W04-S04 · Jordan Kim

Rationale: Retaining all of this information matters because it provides more detailed information that can be used for an exception review.

Acceptance check: Detailed access to the history may be accessed by those who follow staff roles.

Priority: Must · **Validation:** Confirmed by Jordan Kim

Conflict or decision: The minimum information staff is provided with only necessary information for the given task, and detailed access follows staff roles. This is to eliminate the risk of distracting the staff with too much or less important details.

Professional Guidance Assessment

IIBA: IIBA is a professional association that publishes business-analysis standards and career resources that allow the use of broad analyst processes such as needs, stakeholders, design, requirements, and evaluation.

ISO/IEC/IEEE 29148: Together, they publish ISO/IEC/IEEE 29148, which forms an international standard for system and software use and development.

PMI: PMI focuses on project delivery, while Week 4 focuses on the requirements reference.

Application: The guidance helped me make requirement 4 more clear by providing me with a fresh new set of information that I can apply to ensure that specific guidelines and standards are being met.

Prepared in Command Nexus. Canvas remains the official submission point.
